<p>09/30/16 Certificate of Plan Approval - Full Approval. Subject plans submitted 09/21/16 and response letter dated 09/30/16 were reviewed for conformance with the 2011 Ohio Building Code, Use Group A-3, Construction Type VB and the contingencies noted on the 08/22/16 plan review were addressed. Therefore the subject plans have been granted FULL APPROVAL for construction.</p> <p>08/22/16 Certificate of Plan Approval - PHASED APPROVAL.</p> <p>Subject plans for a new building were reviewed for conformance with the 2011 Ohio Building Code, Construction Type VB and the following contingencies and plans have been determined to be in compliance with applicable code regulations and are granted a phased approval subject to compliance with the following conditions: GENERAL REVIEW Section 106.1.1 1. Drawings are incomplete to determine conformance with OBC requirements. The following information must be shown: a. Determine by soil analysis the actual soil bearing value of existing subsists and compare to the designed load bearing value of foundation. If data is not available from immediately adjacent areas, soil borings or other acceptable soil investigations must be made and submitted in accordance with Section 106.2. Report must be prepared by an Ohio registered design professional. b. Submit manufacturer's drawings for pre-engineered metal building. Drawings must bear Seal of Ohio Registered Engineer or Architect. Section 102.1 2. Use Group is incorrectly identified as A-2 on Sheet T1. Use Group A-3 is assumed. Applicant must verify. Section 106.1.103 3. Since occupant load exceeds 50, panic hardware must be installed on all exit doors which latch. Section 106.1.2 4. Submit statement of special inspections as indicated on Sheet T1. The special inspector shall submit inspection reports to the building official, and to the registered design professional in responsible charge. A final report documenting required special inspections and correction of any discrepancies noted in the inspections shall be submitted to the building official prior to the issuance of the certificate of occupancy. MECHANICAL REVIEW 1. No Mechanical contingencies were noted. ELECTRICAL REVIEW NEC 100.16.1 Electrical equipment, such as switchboards, panelboards, industrial control panels, meter socket enclosures, and motor control centers, shall be field marked to warn qualified persons of potential electric arc flash hazards. The marking shall be located so as to be clearly visible to qualified persons before examination, adjustment, servicing, or maintenance of the equipment. Equipment shall be marked.</p> <p>Beaumont Scout Camp Handicraft Pavilion</p>

Subject plans were reviewed for conformance with the 2011 Ohio Building Code, Use Group A-2, Construction Type VB and has been granted a **Full Approval** subject to compliance with the following conditions:

OBC Section 901.5.1. Fire protection systems shall be tested in accordance with the requirements of this code, the fire code, and the applicable standards referenced in this code. Required acceptance tests shall be conducted at the expense of the owner or the owner's representative. Test results shall be documented and certificates shall be submitted to the building official upon completion. Copies of test records and certificates shall also be maintained at the jobsite and made available to the inspector conducting the fire protection systems final inspections.

OBC Section 903.4.2. The automatic fire sprinkler drawings indicate 3 tamper switches, 2 on the backflow preventer (basement) and 1 on 1st floor riser valve. Coordinate and provide supervision of these valves.

OBC Section 903.4.2.3. The automatic fire sprinkler drawings indicate an exterior audible waterflow alarm near the fire department connection. Coordinate and provide the exterior audible waterflow

08/18/16 Certificate of Plan Approval - Full Approval

Revised plans and the email dated August 12, 2016 from Building Systems, Inc with the attached wood truss manufacturer's drawings were reviewed for conformance with the 2011 Ohio Building Code, Use Group B, Construction Type VB and contingencies noted in our letter dated June 20, 2016 were addressed. Therefore the subject plans are granted FULL APPROVAL for construction.

08/20/16 CERTIFICATE OF PHASED PLAN APPROVAL: Revised plans and Engineer's letter dated May 21, 2016 were reviewed for conformance with the 2011 Ohio Building Code, Use Group B, Construction Type VB and contingencies noted in our letter dated May 11, 2016 were addressed. Subject plans have been granted a PHASED APPROVAL, remain subject to compliance with the following condition: GENERAL REVIEW SECTION 503.2. Subject work must have manufacturer's design drawings for review and approval. Drawings must bear a Seal of Ohio from a Registered Architect or a Registered Engineer.

NOTE: Subject plans are hereby issued a PHASED APPROVAL status (OBC 503.2). The holder of this phased approval may proceed only to the point of FOUNDATION AND EXTERIOR WALLS ONLY, at the builder's own risk and without guarantee that approval for the entire building or structure will be granted.

*Owner/owner agents are advised to respond to all of the above-mentioned contingencies, submit additional drawings and/or documentation to verify compliance for approvals. Pursuant to Ohio Revised Code Chapter 3781 and 3791 owner and owner agents are responsible for compliance with the rules of the Ohio Board of Building Standards.

Section 1101.2 1. All new buildings, additions or alterations must comply with ICC A117.1-2009 requirements as followed:

- a. Section 601: All public and common use toilets must be accessible.
- b. Section 604.2: Centerlines of water closets must be 16-18 inches from the side walls.
- c. Section 604.4: Accessible water closet seats must be 17 to 19 inches above the floor.
- d. Section 604.5.1 and 604.5.2: Side grab bars at the accessible water closets must be no less than 42 inches long and must begin no more than 12 inches from the rear wall. In addition, a vertical grab bar 18 inches minimum length shall be mounted with the bottom of the bar located 39-41 inches from the rear wall. Rear grab bar must be 36 inches long and must extend from the centerline of the water closet 12 inches minimum on the side closest to the wall and 24 inches minimum on the transfer side. Mount grab bars 33 to 36 inches above the floor to the top of the grab bar.
- e. Section 604.7: If the toilet paper dispensers are above the grab bar, the outlet must be within an area 24-36 inches from the rear wall; if below the grab bar, the outlet shall be 24-42 inches from the rear wall. The outlet shall be 18-48 inches from the floor.
- f. Section 606.2: Accessible lavatories must have a maximum height of 34-inches above the floor and knee clearance of 9-inches height for 11-inches depth, and 27-inches height for 8-inch depth.
- g. Section 606.6: Exposed hot water and drain pipes under lavatories must be insulated.
- h. Section 603.3: Bottom edges of mirrors must be no higher than 40 inches above floor.
