ELECTRICAL METER RE-SET

Owners of commercial and residential buildings that simply need a meter re-set to restore power to their buildings are advised to contact a licensed State of Ohio Electrical Safety Inspector (as it states in the Ohio revised code section 3783.06) for them to inspect and submit approval documentation to the respective utility company for re-setting of electrical meters. Please see the following helpful information:

1. Contact Illuminating Company 1-800-589-3101 to obtain a 9 digit work order number.
2. Contact a State of Ohio Certified Electrical Safety Inspector and provide them with your 9 digit work order number.

Cory Hubbard 440.319.1979
Mitch Storozuk 440.855.3167
Henry Notter 440.964.7965
3. If a Certified Electrical Safety Inspector is not available, as it states in FirstEnergy's customer guide for electric service for Ohio: Section 3.9.2 (in any area where there is no local or state inspection authority available the inspection can be performed by a State of Ohio licensed electrician).
4. Visit the Ohio Department of Commerce Online Licensing lookup: <https://elicense4.com.ohio.gov/Look/LicenseLookup.aspx> for a list of State of Ohio Licensed Electrical Contractors in your area.
5. They will send your inspection report to your electric provider below.
